

# KENTANK

**KENTAINERS**  
innovative solutions for lasting prosperity

Dear Customer,  
We thank you for purchasing and believing in KENTANK the Most trusted brand in the market for over 25 years. To help serve you even better, below are the guidelines to be observed during installation.

## KENTANK INSTALLATION INSTRUCTIONS

### DO

- Place the tank on a fully supported flat base with no gaps
- The base must be bigger than the tank diameter
- Drill inlet and outlet at specified location only with drill machine.
- Always provide an overflow and drain away from the base
- Use plastic fittings and flexible pipes if interconnecting two tanks.
- Use rubber washer always, between tank and back nut

### DON'T

- Don't drill holes with a hot metal rod or knife
- Don't leave any stones or sharp objects on tank base
- Don't raise 10,000 litres and above tanks more than 20 ft above the ground

**NB: THE COMPANY HAS NO LIABILITY FOR LOSS, IF THE RECOMENDED GUIDELINE IS NOT FOLLOWED DURING INSTALLATION.**
